PROJECTS

Sekiro - Workout Tracker

- A web application which allows location tracking and recording your workouts using the leaflet Map JavaScript plugin.
- Integrated localStorage API to allow users to store their workout data directly in the browser.
- Utilises OOP programming and declarative programming principles.

[VIEW PROJECT](#)

Ichiraku - Create & Search for Recipes

- Allows searching for over 1,000,000 recipes online using the forkify API.
- Create and upload your own recipes to the API.
- Utilises the localStorage API to allow bookmarking your favorite recipes.
- Utilises OOP programming and declarative programming principles and techniques.
- Implemented the MVC architecture for the organisation and structure of the application to ensure easier addition of new features and updates.
